

# Team Bi-Weekly Status Report

## CSCE A401 Software Engineering

Team Name: TEAM AWESOME

Report As Of Date: 9 Oct 2017

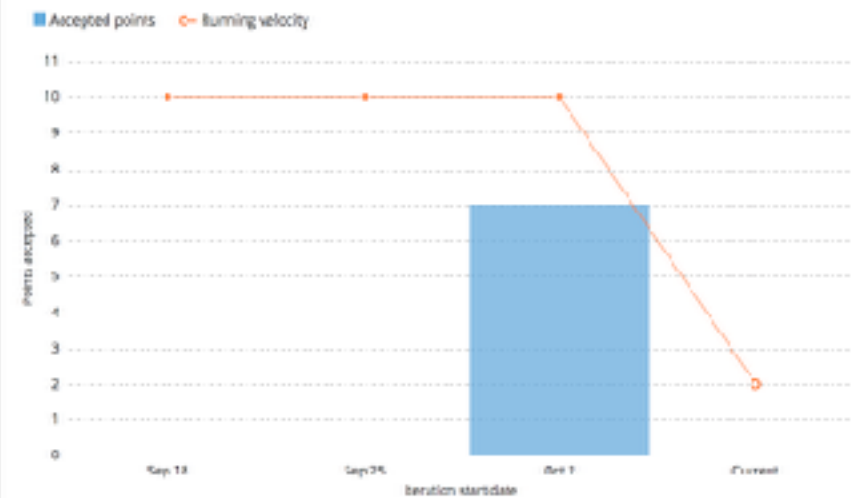

Project Name: SNAP

Date of Last Client Mtg: 2 Oct 2017

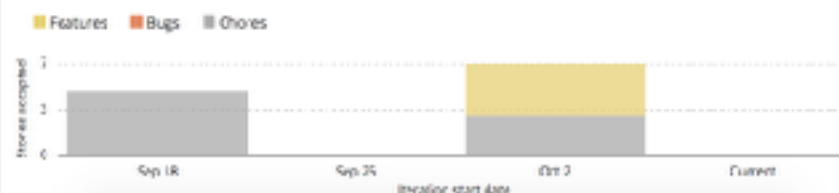

Velocity:

### Points Accepted

Velocity: 1411% - Sum of all Deviations: 281pts (based on page 3 Deviations)

### Accepted Story Type Composition

Next Two-Week Stories: Adapt the PartiView generator to create files for three.js, Create visualization window, create sub-tabs for file selection

Last Two-Week Story Accomplishments: Determined input needed for three.js, designed UI for visualization, Created Visualization, implemented rotate, pan, and zoom

Risks: spending too much time on chores

Issues: Was working on a way to translate partiview input files into three.js, when we needed to focus on the code that generates the files. Our client wants both, partiview and three.js files created.
